ALLEY DWELLING AUTHORITY

IN AN ATTEMPT TO IMPROVE LIVING CONDITIONS IN WASHINGTON D.C., THE ALLEY DWELLING AUTHORITY STARTS TO DOCUMENT AND EVALUATE HOMES BASED ON WHAT THEY CONSIDERED PROPER LIVING CONDITIONS.

THE DOCUMENTATION WAS SENT TO LEGISLATION FOR APPROVAL TO DEMOLISH ALLEYS AND RENOVATE THEM INTO BETTER HOUSES.

THE INTENDED PURPOSE OF THE ALLEY DWELLING AUTHORITY WAS, AS SHOWN IN THE IMAGE ON THE LEFT, TO REDUCE CRIME AND LOWER DEATH RATES, BUT AS ALLEYWAY DWELLINGS WERE USUALLY OCCUPIED BY AFRICAN AMERICANS, PROJECTS COMPLETED BY THE ADA RESULTED IN THE EXCISING OF THE BLACK POPULATION FROM THESE DWELLINGS.

HOPKINS PLACE. London Court, an inhabited alley in Southeast Washington, designated when the Alley Dwelling Authority chose this site for its first low-rent housing development. In this view, an occupant of 1 of the 11 residential houses sits on the driveway facing the 12 new two-story dwellings owned by the Authority.

Report of THE ALLEY DWELLING AUTHORITY FOR THE DISTRICT OF COLUMBIA FROM ITS APPOINTMENT TO DECEMBER 31, 1936

Authority Created: Funds Made Available

The DOWNEY or COLUMBIA ALLEY DWELLING ACT was enacted by Congress in 1934 and approved by President Roosevelt on June 12. On October 9, 1934, the President designated the members of the Authority. On November 10, 1934, \$500,000 was made available for its work. The unexpended balance and the receipts of the fund have been continued available by Congressional action. On December 31, 1935, a further sum of \$200,000 was allocated by the President from the Emergency Relief Appropriation Act of 1935. Of this sum \$7,800 was later returned to the WPA. The first purchase of property was made in May 1935.

Use Made of Its Capital

With its capital sum of \$500,194 the Authority has:
Purchased required property in 10 squares.
Redeveloped its acquisitions in 6 squares.
Began redevelopment in 3 squares.
Began acquisitions in 3 squares.
Acquisitions in two squares have been sold.

Purpose of the Alley Dwelling Act

The stated purpose of the Alley Dwelling Act is to aid the District of Columbia of its inhabited alleys. As a corollary it is also to care for the alley population. To carry out this purpose the Authority is authorized "to purchase or acquire by condemnation or gift, any land, buildings or structures, or any interest therein, situated in or adjacent to any inhabited alley in the District of Columbia, and such other land, buildings or structures within any square containing an inhabited alley as he (the President) may determine to be necessary for the replanning and improvement of said square, pursuant to the provisions of this act."

longer from a past stage of the city's development. At the same time the Authority, recognizing that private enterprise is building practically no dwellings for Negroes of the low and lower income groups and that its own reclamation work in raising, demolition of dwellings they occupy, has sought alley squares in which low-rental dwellings would be appropriate. Hopkins Place, on the site formerly known as London Court, was the Authority's first low-rent housing project.

Handicap in Providing Low-Rent Dwellings

The Authority is, however, definitely handicapped in providing for these people because its operations are confined to squares containing inhabited alleys. This means that they are confined to built-up sections of the "old" city where land prices are comparatively high and where existing redeveloping buildings, dilapidated and substandard though they are, must be purchased and then demolished. This adds to size cost. The Authority, therefore, takes every opportunity to urge that private enterprise, which is free to utilize cheap sites, provide more low-rental dwellings. So far there has been no response.

Financial Policy

All of the Authority's capital of \$690,194 has been invested or allocated. There is, however, on hand a sum of \$85,000 recently received from a sale of property and not yet allocated to a new project.

The first 6 months of the Authority's existence were necessarily spent in assembling its staff, organizing its work and learning what it could and could not do under the terms of the act. As a result of this preparatory work it has had to retrace only two steps. Since the time of its first purchase in May 1935, its operations have resulted in a slight profit, so the outgo during the formative months has been more than met. This is due to receipts from demolitions, \$2,476.98; sales, \$86,760; rents and leases \$11,228.75; totaling \$100,466.73.

In slum reclamation the Authority desires what profit it can make consistent with a redevelopment that is in the public interest—for, of course, it would be in contravention of the purpose of the act to substitute a new commercial use in place of an old one. In its low-rent housing projects the Authority seeks to provide the simplest dwellings that will be approved by an informed public opinion, secure their construction as inexpensively as possible consistent with minimum costs for maintenance and repairs, and then rent them at rates that will provide for operation, amortization and a return of 3 percent on the total cost.

Theoretically this should result in considerable profits on slum reclamation projects where low-rent housing is not a factor. Actually as in business

WHAT IS AN INHABITED ALLEY? This plan, with alley houses and principal commercial establishments emphasized, indicates the character of the problem faced by the Authority. The alley is Taylor's Court. Its dwellings are hidden from street view. Its width and juvenile delinquency rates are high.

WHAT WOULD YOU DO WITH IT? View of Taylor's Court from the Center Market. The Authority must find a use for this alley that will harmonize with the commercial surroundings. Hours evidently do not belong here.

PURCHASES

The following tabular statement shows the status of the Authority's property acquisitions in projects definitely decided upon to date:

Site acquisition, Alley Dwelling Authority, as of Dec. 31, 1936

Project no.	Name of alley, section, and square no.	Number of alley dwellings	Number of other dwellings	Number of owners	Area of project	Area acquired	Contract price	Assessed value	Percent of contract price to assessment	Cost per square foot
